Site Agent

Description

We are seeking a highly competent Site Agent a project in Leicestershire. This critical infrastructure improvement scheme involves clearing and installing access roads using stone and track mats, raising wall levels, creating scour channels, and installing pipework, ductwork, valves, and kiosks to facilitate flow measurements from the reservoirs.

Responsibilities

- Oversee and manage site operations
- Coordinate the installation of access roads, wall raising, scour channels, and utility installations
- Ensure all work is completed to high standards and within project timelines
- Manage site safety, quality, and compliance
- Liaise with project stakeholders and manage site teams

Qualifications

- **Engineering Background:** Strong foundational knowledge in civil or structural engineering.
- **Black CSCS Card:** Demonstrates high-level skills and expertise.
- **SMSTS:** Site Management Safety Training Scheme certification.
- **3-Day First Aid Certification:** Ability to manage on-site health and safety.
- **Confined Space Certification (Medium Risk):** Qualified to work in confined spaces safely.
- **Temporary Works Coordinator (TWC):** Experience in managing temporary works.
